

Company

Among the world's largest financial services companies.

The Opportunity

Our client is a large multinational financial services company, over 200 years old. They have a presence in over 140 countries, with more than 16,000 offices, employing more than more than 250,000 people worldwide. The company provides individuals, corporates, governments and institutions with a wide range of financial products and services, including consumer banking and credit, corporate and investment banking, securities brokerage, transaction services, and wealth management. In the year 1995, they were looking to fill some key positions with Information Technology, Finance, and Data experts. The company already outsourced some part of their staffing requirement through VMS and was looking for a reliable partner to help them meet their staffing needs.

The Sunrise Business Solution

The Sunrise Systems sales team recognized the opportunity to foster a strong partnership with the company. With our dedicated recruitment and sourcing teams we are known to find experts in disparate locations. We were confident that we could support this customer's requirements with our vast network of Finance and IT professionals. We recommended a staffing solution model wherein we would work with a dedicated candidate care center. The model entailed rigorous background checks and validations as well as dedicated Account Management and points of contact for problem resolution.

Our unique, customer-centric approach gave the customer the confidence to partner with us – a partnership that has lasted since 1995. We have helped this customer fill hundreds of key positions, with the right skill sets, across their various group companies, thereby increasing efficiency and productivity across the board. Our efforts have helped this corporation leverage people skills to maximize their RoI.
